EDUCATION

The University of Waikato

Hamilton, New Zealand

Third Year Software Engineering Student

2024 – Present

- **Relevant coursework:** Data Structures & Algorithms, Software Design, Web Development, Artificial Intelligence, Databases, Networks & System Architecture, and Engineering & Business
- **Scholarships:** University of Waikato International Entrance Scholarship (2024–2026), Vice-Chancellor's International Excellence Scholarship (2024)

SKILLS

Programming Languages: Python, Java, C#, JavaScript, TypeScript, SQL, Bash

Technologies: React, Node.js, AWS (EC2, S3), MySQL, Unity, VMware, Linux, MCP, Docker, Firebase

Proficient Languages: English, Mandarin Chinese

PROJECTS

RevDex | *React Native, TypeScript, Expo, Firebase, Gemini API*

Ongoing

- Building a Pokedex inspired car-spotting mobile app where users photograph vehicles to identify make, model, and year via the Gemini Flash API. Firebase Auth and Firestore is used for user accounts and persistent digital garage of spotted cars.

TestPilot | *TypeScript, Node.js, AWS S3, MCP, Client side Claude*

2025

- Developed an automated end-to-end and UI testing MCP server during my internship at MEA Mobile, designed with a modular, AI-agent approach to streamline QA workflows and significantly reduce manual testing effort.

Suppsense | *HTML/CSS, Node.js, AWS EC2, MySQL, ChatGPT API*

2025

- Application that allows users to scan supplement barcodes to retrieve ingredient lists and get AI-generated summaries based on real-time web searches. Aims to debunk misinformation surrounding supplements.

Remote Subnet Connection | *RouterOS, VMware ESXi*

2024

- Configured routing, NAT, and WireGuard tunnels on virtual and physical MikroTik routers to enable inter-subnet and remote subnet communication in a real world environment.

EXPERIENCE

MEA Mobile

Hamilton, New Zealand

Software Intern

Nov 2025 – Feb 2026

- Collaborated with the QA team to deliver the TestPilot project, an AI testing agent to reduction in QA workload. Gained broad understanding of MEA Mobile's business operations and product ecosystem.

University of Waikato

Hamilton, New Zealand

Computer Science Lab Assistant

Feb 2025 – Present

- Tutor first-year students in C# and Visual Studio, covering topics from basic variable declarations to complex OOP concepts.

Amoy Oriental Prospect Technology

Fujian, China

Network Intern

Dec 2024 – Feb 2025

- Worked on networking and routing of the company's internal subnet using MikroTik RouterOS to configure firewalls, routing, PPPoE dial-up connections, and WireGuard VPN tunnels.

Waikato Community School of Music

Hamilton, New Zealand

Music Tutor

Jun 2023 – Present

- Deliver interactive music lessons to students ranging from age 5 to 75, working with diverse backgrounds.

VOLUNTEERING

WESMO (Formula SAE Team)

Hamilton, New Zealand

Junior Club Member

Feb 2024 – Present

- Assisted with chassis tasks and collaborated with the software group to create a website for the team.
